**Dr. James O' Connor**  
**Professor, C.T. Wells Professorship in Project Management,**  
**University of Texas at Austin**

Some key learnings will be shared from a 38-year career in research, teaching, and consulting related to capital projects. Learnings will cut across multiple industry sectors, project phases, project objectives/drivers/impacts, research methodologies, course topics, and consulting engagements, among others.

### **Keynote 2: Industry-Academia Collaboration – Lessons Learned, Takeaways, and Insights from Both the Education and Research Perspectives**

**Dr. Tony Dong**  
**National Lead of Research and Business Process Improvement,**  
**DPR Construction**

Industry-academia collaboration – lessons learned, takeaways, and insights from both the education and research perspectives. The speaker will reflect on his four-year-long collaboration with the industry as a Ph.D. student and then a seven-year journey as the liaison between DPR and academia.

### **Keynote 3: Why I've devoted my life to advancing Lean Construction**

**Dr. Glenn Ballard**  
**Research Director, Productions Systems Laboratory,**  
**University of California, Berkeley**

Now 77 years old, I've devoted the last 40 years to advancing Lean Construction. In my talk, I will try to explain why I've done that and why you should do the same. Here is a taste of what's to come: Why Lean Construction? Because doing construction the Lean way provides more value to customers; a better quality of work-life for designers, builders, and suppliers; and reveals career opportunities for young people.

### **Keynote 4: Integrating Industry 4.0 Technologies for Construction Management – A proof of concept study**

**Dr. Marwan Abu Ebeid**  
**Digital Transformation Lead,**  
**Turner Construction International – Middle East**

This presentation demonstrates a proof-of-concept for integrating Blockchain and the Internet Of Things into an automated BIM process to monitor and control the information flow. The case study focuses on eliminating human errors and establishing a single automated source of truth to increase transparency and enable enhanced decision-making. To this end, the proof-of-concept introduces a monitoring system that is reliable and fully automated through data gathered by IoT, transacted through Blockchain, and presented through BIM platform.

## **Pre-Conference Workshops**

---

### **Pre-Conference Workshop 1: Serious Games for Construction Management**

- **Workshop leaders:** Dr. Zofia Rybkowski (TAMU) & Dr. David Jeong (TAMU)
- **Date & Time:** June 20, 2022, 12:30 PM to 2:15 PM

- **Description:**

This workshop will be fun and very entertaining. You will laugh a lot and make new friends. Please join us. The session will provide a hands-on experience of serious games to help you develop an intuitive understanding of difficult-to-grasp project management principles. The intention of serious games is to help participants experience an “A-ha” moment about ways to successfully address construction management situations that can then be applied to the real world. In-person games, as well as Virtual Reality (VR) games in a group setting, will be available for workshop participants.

- **Free for Conference Attendees**
- **Description:**

Modularization is a simple concept – Move what you want to build to a place where it can be built cheaper, better and faster – than move the finished unit back. So, what’s the big deal? Oh, yea – “the devil is in the details”..... In this workshop, we will introduce you to the “details”: How to approach the task, common pitfalls, suggested solutions, and lots of other groundwork needed to become a module “rock star”. All approached from a unique perspective, shown in a different way than you may have seen before.

## **Pre-Conference Workshop 3: Connecting Construction Workflows in the Cloud**

- **Workshop leaders:** Dr. Jeonghan Woo (Cal Poly), Nicole Thomas (Autodesk), John Herridge (Autodesk)
- **Date & Time:** June 20, 2022, 2:45 PM to 4:30 PM
- **Free for Conference Attendees**
- **Description:**

Technology is transforming the way buildings and infrastructure projects are designed, constructed, and operated. Learn how you can utilize the Autodesk Construction Cloud (ACC) to expand & transform your digital construction workflows and increase collaboration across the entire construction lifecycle. Hear about our latest curriculum offering exploring the convergence of construction and manufacturing through the lens of industrialized construction.

## **Health Protocols**

---

- ICCEPM 2022 will follow applicable federal, state, and local laws. We will monitor and adjust plans and health protocols as necessary. We encourage attendees to get COVID-19 shots at least two weeks before the conference.
- Currently, masks are NOT required in public places. But ICCEPM 2022 recommends attendees wear a mask to protect themselves. However, we will not make it mandatory.
- International arrivals require COVID testing and vaccination before entering the USA by the government, but there are no travel bans against specific nations. Fully vaccinated international travelers are now allowed entry into the United States, including Las Vegas.
- There are no restrictions on domestic travel to Las Vegas or the state of Nevada. While the state will no longer require masks in public places, there are locations where Nevadans and visitors may still be asked to wear a mask.
- UNLV strongly encourages individuals to continue to wear masks when indoors, and where social distancing is not possible.
